For All Surgeons and Providers Using ImageStream
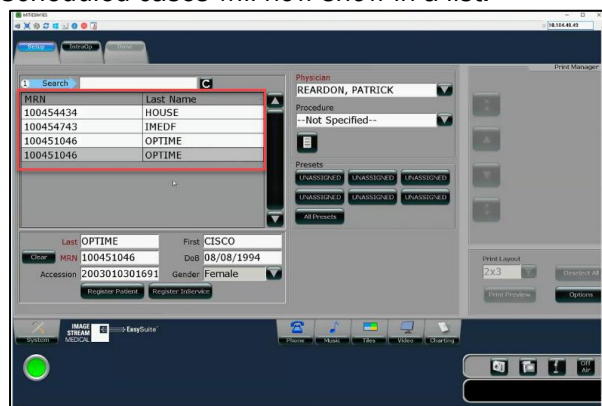

ImageStream Integrating with Epic
*Effective Monday, Sept. 21*

EasySuite - Image/Video Capture
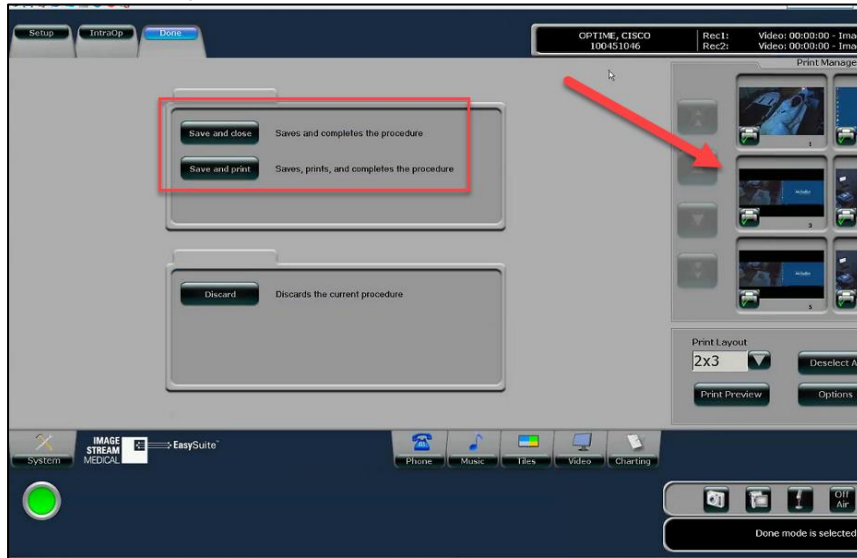

1. Scheduled cases will now show in a list.

2. When a patient is selected by **MRN** and **Last Name**, the following details are automatically populated:
    a. Last Name
    b. First Name
    c. MRN
    d. DOB
    e. Accession (CSN/Encounter number)
   f. Gender
    g. Physician Name

Note: *Application functionality is not changing. You will continue taking images/videos, per usual.*

3. Once the case is saved, all selected images will be automatically sent to Epic. **Note:** Video will only be viewable in **EasyView**.

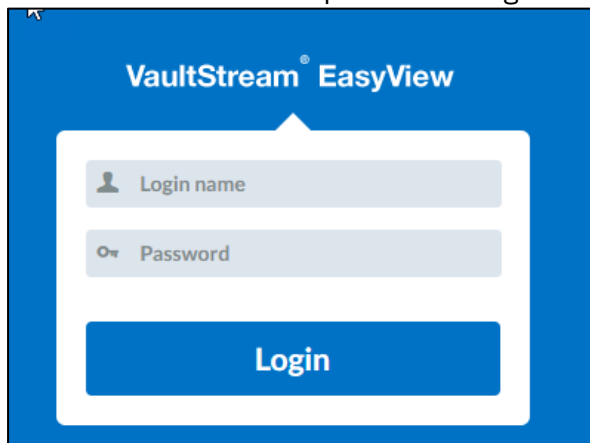

5. Images saved during the case are viewable in the patient's chart.
   a. Go to **Chart Review > Media**.
   b. Double click the appropriate row to view the PDF that contains the embedded images.

EasyView Web Portal

1. To access images and video on the **VaultStream EasyView** web portal, you will now use your Houston Methodist network ID and password to log in.

2. Use the web portal as you normally would.
   a. Enter search criteria to filter result set.
   b. Double click to select patient.

3. Additional image captures can be taken from video with the option of sending the additional images to the patient's chart.
   a. Select the **Export to Server** option at the bottom of the screen.
   b. Select **EMR**.
   c. Click **Yes** to confirm.
