HCC BPA – Risk Adjustment Factor

Audience: PCG Providers

HCC BPA enhancements:

- You can open the HCC BPA from Storyboard it no longer appears in the Best Practice Advisory section of the Plan activity.
 - **Note:** If you don't open the BPA from Storyboard, you will receive a pop-up alert to address open conditions within the visit diagnosis section.
- Icons give you more information about the diagnosis origin.
- Document Assessment & Plan note within the BPA.

HCC BPA – Features

• Icons are displayed to show the diagnosis origin:

e	The diagnosis comes from a C-CDA document, brought into your system through Care Everywhere.
	The diagnosis comes from an external, paid claim brought into Chronicles using the Healthy Planet medical claims Datalink action.
i	Epic can evaluate clinical information to determine if a condition should be considered suspected in order to prompt a provider with the diagnosis. This icon indicates a suspected diagnosis.

- You can document Assessment & Plan notes directly from the BPA.
- Documentation can be pulled into the clinician's progress note using the SmartPhrases below or SmartLinks:
- Add SmartPhrase:
 - .probdiag
 - .probdiagnorefresh
 - Select Problem List Dx and Orders from SmartLink within note templates:

- Note: Entering documentation does not reflect within Progress Note unless SmartPhrases/SmartLinks are utilized.
- For CMS compliance, ensure documentation reflects within the **Progress Note** to support billing HCC conditions and visit diagnosis.

HCC BPA Workflow

• Hover over the HCC BPA in Storyboard to see list of open conditions.

- Click on the HCC BPA in Storyboard.
- The BPA will open, allowing you to address open conditions.
- Documenting within the Assessment & Plan Note from the HCC BPA will appear in the Current Assessment & Plan Note of the Problem List section when utilizing SmartPhrases/SmartLinks.
