

For Everyone

HM Surpasses 1 Million MyChart Patient Account Activations

Houston Methodist MyChart has surpassed 1 million patient account activations. Plus, this year alone, more than 683,000 patients have logged in to their **MyChart** accounts.

MyChart provides access to personal health records, including visit summaries, medications and recent lab and imaging results. With **MyChart**, patients can also communicate with their HM providers, pay their hospital bills and schedule future appointments. Recently, **MyChart** functionality expanded to include:

- Storing and sharing COVID-19 vaccination and testing records.
- Reviewing assigned educational materials related to your condition and diagnosis.
- Ordering approved meals while admitted at select HM hospitals.
- Viewing cost estimates for common procedures, based on your insurance.
- Viewing and downloading radiology and cardiology images (starting Dec. 13).
