Results Review Display Options

Audience: Physicians, Nurses, Clinicians

More Details and Larger Data Displays

To see more details and larger data displays, hover over data fields to open the results hover bubble.

Personalize Your Display View

To personalize your display view and select different color schemes:

- 1. From the Epic drop-down menu, select Personalize.
 - 2. Click Themes.
 - 3. Select the color scheme you want to use. **High Contrast** mode reduces subtle variations in colors and is preferred for individuals with visual impairments, like colorblindness.

To change your **Results Review** display settings, click the **wrench icon** to open **User Settings**. Here, you can change things like your **Font Size**, **New Results Highlighting** and data settings.
