

Secure Chat 'Chat with All' Option Removed

Removing 'Chat with All'

- On Tuesday, Jan. 24, the “chat with all” option will be removed.
- It's not necessary to chat with the whole team, when you only need to communicate with 1-2 team members.

MRN: 100358019

Respect Other Group Members

- Avoid group messages whenever possible.
- Send group messages only to individuals who need the information and avoid sending messages to entire teams.

Note: Chat with Others opens a new Secure Chat conversation with the patient's chart attached and the To: field blank.

Chatting with Treatment Team

- Chat only with those who need to receive the message.
- When you attach a patient's chart to a new Secure Chat message, the treatment team and care team members automatically populate in the dropdown, so you can easily select only those who need to receive the message.

The screenshot shows a 'New Conversation' window in a healthcare system. At the top, there's a header with a close button (X). Below it, a patient's information is displayed: a profile picture, the name 'Chgt, Walterthree', and the ID '100451261'. To the right, the patient's date of birth '9/22/1943, 79y M' and the name of the medical professional 'Ehrlich, Lisa Lee, MD' with ID '0738 0738-A' are shown. Below this, there's a 'To:' field with a red exclamation mark icon. A dropdown menu is open, showing two categories: 'Treatment Team' and 'Care Team'. Under 'Treatment Team', there are three members: Joyce Butuk (Respiratory Therapist; HMCC Hospital at TMC, Available until 9:23 PM - Signed In), Anthony Aaron, RN (Registered Nurse; HOUSTON METHODIST SERVICE AREA), and Physician Beacon, MD (Consulting Physician; Hematology and Oncology; HMH OPC, Available). Under 'Care Team', there is one member: James Berdou (Social Worker; Houston Methodist West Hospital). At the bottom, there's a 'Care Team' section with one member: Tania Urbina. The bottom of the window has a message input field with a placeholder 'Enter a message', a star icon, and a 'Send' button.
